Date	3 September 2026	Day	Day 1
Company	MySoft Heaven BD	Session	Introductory & Orientation
Supervised By			
Imdadul Haque		Sr. Software Engineer	
M. H. A. Afif		IT Business Analyst	

1. Introduction

The first day of our industrial attachment was held on 3 September 2026 at MySoft Heaven BD. The day was mainly an introductory and orientation session. We were given a clear idea of how the industrial attachment would be conducted, what would be expected from us, and how we should organize ourselves throughout the program. It was a useful starting point because it helped us understand the purpose of the attachment before beginning the actual project work.

2. Orientation by the Supervisors

Our supervisors, Imdadul Haque – Sr. Software Engineer and M. H. A. Afif – IT Business Analyst, welcomed us and explained the overall structure of the industrial attachment. They discussed how our activities would progress, how the project would be carried out, and how our work would be evaluated. They also informed us about the project deadline and gave us an initial idea of how we should proceed step by step.

3. Group Formation and Project Direction

During the session, we were divided into three groups. Our group was named AnomalyX. The supervisors explained the general expectations for the project and encouraged us to work as a team, communicate properly, and maintain a clear plan throughout the attachment. This helped us understand that completing the project successfully would require both technical work and effective teamwork.

4. Introduction to MySoft Heaven BD

We were introduced to the company and its working environment. The CEO of MySoft Heaven BD, Md. Mofakharul Islam, was introduced to us, and we received an overall idea about the company and its professional environment. We were encouraged to take the industrial attachment seriously and use the experience to develop practical skills that would be useful for our future careers.

5. HR Session and Office Environment

The HR representative, Aleya Parven, introduced us to the different office departments and explained where the employees work and what responsibilities are handled by different teams. This gave us a better understanding of how the company operates and how different departments work together. She also helped us become familiar with the office environment and provided the necessary resources and information required to begin our attachment.

6. Professional Guidance

The session also included practical guidance about office management and time management. We were advised to be punctual, responsible, organized, and professional while working in the office. The supervisors also discussed future career directions and encouraged us to use this opportunity not only to complete our project but also to learn how a professional workplace function.

7. Overall Reflection

Overall, the first day was informative and helped us get a clear picture of what to expect from the industrial attachment. We became familiar with the company, our supervisors, the group structure, the project timeline, and the professional behavior expected from us. The orientation gave our team a clear starting point and helped us feel more prepared and confident about the work ahead.
