Date	6 September 2026	Day	Day 2
Company	MySoft Heaven BD	Session	Project Discussion & Selection
Supervised By			
Imdadul Haque		Sr. Software Engineer	
M. H. A. Afif		IT Business Analyst	

1. Project Introduction and Discussion

On the second day of our industrial attachment, our supervisors introduced us to several possible project ideas and explained how each project could be implemented. They discussed the basic concept, expected workflow, and practical direction of the proposed projects. This helped us understand the type of work we would be doing during the attachment.

2. Project Scope and Future Possibilities

The supervisors also explained the future scope of the projects and how the ideas could be developed further beyond the initial implementation. They discussed the possible applications and improvements that could be made in the future. This gave us a better understanding of the long-term potential of the projects and helped us think about which one would be suitable for our team.

3. Project Selection

Each team was asked to choose one project from the available project ideas. We discussed the different options within our team and considered the information provided by the supervisors. We were given one day to discuss the options and confirm our preferred project, allowing us enough time to understand the requirements before making the final decision.

4. Project Information and Resources

To help us make an informed decision, the supervisors provided relevant information and necessary resources for the proposed projects. These resources gave us a clearer idea about the technologies,

requirements, and general direction of the work. Having these materials before project confirmation helped us understand what would be required from our team.

5. Question and Answer Session

Throughout the session, we were encouraged to ask questions about the projects, their implementation, requirements, and future scope. Our supervisors answered our queries and clarified the points that were not clear to us. This discussion helped us reduce our confusion and gave us more confidence in evaluating the project options.

6. Overall Reflection

Day 2 was mainly focused on understanding the available projects and preparing for project selection. The explanations from our supervisors, along with the provided resources and question-and-answer session, helped us understand the projects more clearly. The additional one-day confirmation period also gave our team time to discuss the options carefully before finalizing our project.
